Education

University of Science and Technology of Ha Noi

Information and Communication Technology (2021-2024)

About Me

I am a third-year student studying Information and Communications Technology with a strong passion for programming and website development. I am currently seeking an internship opportunity. I want to use my knowledge and skills, along with the will, enthusiasm, inquisitive spirit and good adaptability to contribute and dedicate to the company.

Project

Movie Recommender system   12/2023-1/2024

Members: 7

- Build filters by applying machine learning techniques to select the most suitable movies, and movie genres to recommend to users
- Filters:
  - Content-based filtering
  - Item-based filtering
  - User-based filtering
- Technologies: Python, KNN model
- source: https://github.com/VuKlih/FinalML2-Movie-Recommened-system

Open Dota   9/2023-10/2023

Members: 7

- Utility application for providing real-time information and analytics for the popular online game Dota 2.
- Functions:
  - Track the performance of users, users' friends, and opponents
  - Look up accounts
- Technologies: Java, XML, retrofit
- source: https://github.com/VuKlih/Mobile_OpenDOTA

Managing and Storing Rice Health Data   11/2023-1/2024

Members: 7

- A web application to organize nutrient concentration data collected from rice fields in Phu Tho, including statistical data and Hyperspectral Imaging (HSI).
- Functions:
  - client-side: viewing RGB images with hundreds of red points on it, add, update, delete data, logging in, and registering an account.
  - admin-side: manage users including updating, deleting them, and managing their information.
- Technologies: Java Quarkus, MySQL, python, ReactJS
